Digital Product Management

# Andreu Ortega Blasi

Product Manager | IoT, SaaS & AI | PMP & PMI-CPMAI

Lugano, Ticino, Switzerland

## Summary

I help organizations turn complex technology into products people actually want to use. I'm a Product Manager with 4+ years of experience across IoT, SaaS, and AI-driven solutions, currently leading global product strategy for UPS Digital Services at ABB — driving market development across EMEA, Americas, and India. My path into product management started in engineering: I built PCBs and automation software, then moved into software development and Agile delivery, before transitioning into project and product leadership roles. That technical foundation is still my edge today — I speak the same language as engineering teams, which makes cross-functional collaboration faster and product decisions more grounded. What I bring: Product strategy & roadmapping for IoT/data analytics SaaS platforms serving global markets End-to-end delivery: from RFP/vendor selection to go-to-market execution PMP & PMI-CPMAI certified, with hands-on Agile/Scrum experience Managed several digital solutions in more than 10 markets and achieved a 50 % adoption growth Where I'm focused now: I'm deep in applied AI product development — LLM-based applications, Retrieval-Augmented Generation (RAG) systems, and AI agent workflows. I'm particularly interested in AI-enabled products and intelligent automation that solve real business problems, not just impressive demos. If you'd like a more interactive way to learn about my background, I built an AI chatbot that can answer questions about my experience: <https://career-conversation-chatbot.vercel.app/>. It's also a small example of the kind of AI product work I do.

---

## Experience

ABB

Global Product Manager - UPS Digital Services

October 2024 - Present (2 years)

Cadenazzo

- Manage a portfolio of 5+ digital and SaaS solutions for connectivity and monitoring, coordinating 4 cross-functional teams across EMEA, Americas, and India.
- Contribute to product strategy by analyzing market and usage data, identifying opportunities to integrate AI-driven insights into the product portfolio.
- Led the transformation of a monitoring solution into a predictive fleet management offering — defining user journey maps, coordinating execution, and running pilot tests with KPI tracking.
- Enable 10+ sales and technical teams through training and positioning, while partnering with global stakeholders to align roadmap priorities.

## Ponera Group

### Product Manager - SaaS solutions

June 2023 - October 2024 (1 year 5 months)

Lugano

- Led end-to-end development and launch of 4 IoT-enabled SaaS products as Product Owner, from discovery through deployment, serving 100+ connected assets across multiple customer environments.
- Defined product vision, roadmap, and functional requirements, coordinating cross-functional teams of internal stakeholders and external software providers to translate business needs into scalable digital solutions.
- Managed a network of 5+ technology and hardware vendors, leading RFP/RFQ processes and commercial negotiations to align solutions with business, technical, and budget objectives.
- Directed product governance and stakeholder/CEO alignment across multiple parallel initiatives, evaluating IoT, AI and operational data models to improve asset monitoring and drive automation opportunities that enhanced operational efficiency

## Randstad Digital

1 year 4 months

### Project Manager | Daikin

November 2022 - June 2023 (8 months)

Ghent

As an external consultant in Daikin I performed the following activities:

- Supported a cross-functional team of 5 engineers in delivering an improvement project for a client's air-conditioning system, assisting the Product Owner in prioritizing the backlog and defining sprint content. Also,

developed a Proof of Concept (PoC) for a Matter-based IoT system running over a Thread network, contributing to architecture definition, integration, and testing.

- Acted as a servant leader for the team, facilitating communication, removing blockers, and ensuring alignment with sprint goals.
- Produced both technical and project management documentation, ensuring clarity and consistency across stakeholders.
- Delivered regular project status updates to the Product Owner, contributing to informed decision-making and improved project visibility.

### Project Manager | CNH Industrial

March 2022 - November 2022 (9 months)

Bruges

As an external consultant in CNH Industrial I performed the following activities:

- Participated in multiple short-term agricultural machinery quality assessment projects, helping refine requirements, coordinating with cross-department stakeholders, and contributing to risk identification and mitigation planning.
- Designed and developed project solutions using Python and LabVIEW, integrating IoT devices, Azure IoT services, and data analytics to collect and analyze performance data.

### ToBeIT

Software Engineer

September 2020 - July 2021 (11 months)

Barcelona

Developed Python-based RPA automation solutions for 3 business processes, reducing manual workload and improving operational efficiency.

Collaborated with business stakeholders to translate operational requirements into scalable software solutions, contributing across the full development lifecycle from design to deployment.

Designed databases and data pipelines supporting internal applications and reporting systems, enabling more reliable data access for business decision-making.

### ELECTRONICA DIGITAL DE PROTECCION SA

Electronic Engineer

May 2019 - July 2020 (1 year 3 months)

Mollet del Vallès

- Designed high-voltage controller PCBs using Altium, improving reliability and manufacturability through optimized layout, component selection, and safety-driven design practices.
- Developed control and automation software for electrical substations following IEC 61850 standards, enabling robust communication, system protection, and remote monitoring capabilities.

---

## Education

Universitat Politècnica de Catalunya

Master of Engineering - MEng, Information Technology · (September 2020 - February 2022)

KU Leuven

Bachelor of Engineering - BE, Information Technology · (September 2018 - February 2019)

Universitat Politècnica de Catalunya

Bachelor of Engineering - BE, Information Technology · (September 2014 - March 2019)
